

The Native Azaleas are Here! The Camellia's Are Coming!!

Finally I have found a Source for Native Azaleas I am Happy with!!! This was No Easy Task. Nice Young Plants. Sturdy and Well Branced. 12-24". Many have Buds. These are \$28.00 Thru Fall.

Native Azaleas are Difficult to Propagate from cutting or seed and Rare in the Trade. Most of what is available are Hybrids that are Less Reliable in our Hot Memphis Summers than the True Species.

So we are glad to announce that They Are Here!!! Thru. Nov. Sat. 10-4 or Phone Ahead for Pick up. 901-867-8367. You also can order them [ONLINE](#) for nursery Pick up. No shipping charge will be applied.

Sorry We Can NOT Ship These.
Hurry! We expect these to Sell Out Quickly.

Austrinum: Yellow/Orange/April.
Canescens: Pink/White/April.
Prunifolium: Red/July.
Viscosum: White/Fragrant/June.

The Camellia's are Coming!

I prefer to use Fall Blooming Camellias. They are much Hardier. They come in White, Pink, and 'Yuletide' which is Red and Blooms at Christmas. I have acquired a handful of small affordable (\$39.00 - \$59.00) Camellias and expect to have a few more by this weekend or next. (Yes, Hardy Camellias are a bit pricey. But a Good Plant!)

In my opinion...stay with the Fall Blooming, Sasanqua or Olifera Hybrids, (They will have Snow or Winter in their Name.) If you have had trouble with Camellia's before these will please.

If you can't find what you need here Dan West has a Great Selection, (\$39.00 - \$139.00) I could meet you there by appointment to help you select if necessary.

Best Wishes. See you Saturday. Diane and Wolfgang.
