

Turnip Seed

Turnip Seed, Turnipseed... Say it out loud.
Turnip Seeeed. It is fun for my lips to say...Turnip Seed.

Sowing Turnip Seeds.

Take any Miserable Piece of Ground.
Eradicate the weeds or just cut them very short.

Pour your Turnip Seed into a Bowl that makes a Pleasant Sound
and that Feels Good in your Hands.

Walk out to your Garden Patch or very short weed patch.
Pay Attention to the Wind...
With a Circular Snap or your wrist
Scatter the Seed.
Continue until the patch is covered evenly.
Wait for Rain. Grin Widely.

So Much For So Little Effort.

I have Grown nearly every Kind of Garden.
I have Labored Intensely to Perfect my Soil
and My Arrangements.
Still my Greatest Pleasure is Seed. Turnip Seed, Wildflower Seed, Clover Seed, Grass Seed.

Life In A Capsule.
Requiring only to Touch Soil with its Tail
the Seed becomes Green Life.

Soon there are two Perfect Opposite Leaves. And then Two More.
And you know you are in business.

I love my Wild Flower Gardens, and my Wild Vegetable Gardens best.
On any piece of ground...with very little effort.

Seed Rain Sun Food Flowers.
